MEMORANDUM

To: Mr. J.L. Partin  
From: Mr. T.T. Otteson  
File: WASTE DISPOSAL CO.  
(I-629-10)  
Date: October 25, 1956

You recently called to my attention that there might be danger of industrial waste run-off during periods of rainfall to adjacent property from operations at this facility.

Mr. Moore and Mr. Sniderman have made a complete inspection with this thought in mind, and report that at the present time there is no existing hazard of this nature. The areas surrounding the main bowl are nearly dry, and there is very little oil in evidence in these areas. A strip has been cleaned up adjacent to the South property line.

Mr. Moore will watch this carefully through the approaching winter months, and report any change of conditions.
